Experience

DoorDash

Software Engineer | March 2021 - Present

- One of two software engineers to build out Nationwide Shipping. Helped build and scale the platform to \$14.8M GOV within the first year of operation.
- Led and implemented several features including but not limited to accurate ETAs, a richer item page, and celebrity popups leading to an incremental 23% reduction in contact-rate, 5.6% item conversion, and 118M+ social impressions, respectfully.
- I drove our team's OKRs, created XFN emails/updates to the broader org, and was the DRI for anything and everything shipping, working w/ customers, 3P partners, Mx, and the 10+ service teams we relied on.

Walmart

Software Engineer, Special Projects | September 2019 - March 2021

- Building Walmart's new last-mile delivery service. Executed developing optimization service; trip and task management; as well as shift management.
- Formerly engineered backend core services for InHome including: creating data pipelines, spinning up new scheduling service, and handling membership integration within Walmart.

SAP

Software Development Intern | December 2018 - August 2019

- Matured customer-facing applications and backend services by carrying out new features, refashioning backend pipeline, and upholding team's high code quality.
- Migrated all java services to open JDK 11, sped up deployment process through Jenkins by ~50%, and ensured service-wide security compliance using WhiteSource.

Skills

XFN Collaboration, Strategic Planning, Data-Driven Analysis, Project/Product Management, Communication, Java, Javascript, Python, Docker, K8s, Git, Bash, AWS, RESTful Services

Activities

Bluebonnet Data

Data Fellow | May 2020 - Present

- Serving as data analyst for Mikie Sherill's congressional campaign for NJ-11 by authored data reports and designing a service application to oversee campaign related metrics.
- Worked with TheBoardingSchool's team to deploy strategies towards Harvard's internal election cycle to promote recent grads into the board's across the university.

HackCU

Director of Finance | December 2015 - May 2019

- Lead growth of HackCU by 3x over a three years, directed sponsorship growth five-fold, facilitated collaborations and partnerships with the university, and overseeing financial operations.

Education

University of Colorado, Boulder

B.A. in Computer Science | August 2015 - August 2019
